Carry out your own PhD project!

– in Clinical Psychology / Behavioral Neuroscience –

supervised by

Prof. Thomas Elbert (University of Konstanz)

The Hector Fellow Academy offers you the opportunity to realize a self-developed research project under supervision Prof. Thomas Elbert. He is one of the Hector Fellows, a community of outstanding professors from different research institutions across Germany working in STEM-subjects, medicine, and psychology.

He investigates the consequences of traumatic stress and the psychological genesis of the readiness to use violence and kill. In the laboratory and in conflict areas he explores adaptation and maladaptation of mind, brain and body in reaction to trauma and develops specific therapeutic treatments.

Your profile

You are enthusiastic about developing and investigating an innovative research idea within the discipline of Prof. Elbert
You have a master’s degree in a scientific or engineering subject with excellent grades

Our offer

✔ Opportunity to realize a self-developed research idea
✔ Mentored by an internationally renowned, top-level scientist
